

TL Focus Balanced Fund Class R3

Penniall & Associates, Inc.

3rd Quarter 2010

Tri-Level (TL) Focus

Portfolio Level Focus

Three levels of analysis to deliver investment results. TL Focus begins with the economy and markets. Generally, an improving economy provides a positive environment for investing and investors will get paid for taking risk. The opposite would be true when we have a weakening economy. In addition, the portfolio manager will attempt to identify economic “themes” which are trends that are expected to continue and can even be major agents for change. Identifying a theme early can provide the framework for making profitable investment decisions.

Asset Category Level Focus

The next level of analysis consists of determining asset category allocations and assigning a target level of risk (high, medium or low) for each of the 30 categories tracked. We believe academic literature supports the notion that this level of analysis is the most important determinant of investment performance (Brinson, Hood and Beebower 1986).

Individual Investment Level Focus

The fund will target one mutual fund per asset category. This fund will be selected to be consistent with the target risk level described above and will have carefully measured return characteristics. One unique aspect of the investment level analysis is the manager uses “relevant” time periods to measure performance as opposed to the more common calendar-based time periods (1 year, 3 year, 5 year, etc.)

Fund Description

The TL Focus Balanced fund is a “fund-of-funds” and will typically own 30 institutional class mutual funds. The fund’s objective is to deliver a balance of safety and income as well as capital appreciation. The fund will benchmark performance versus a blend of indexes which are deemed to be representative of the desired risk and reward characteristics of the fund. The blended benchmark is 40% fixed income and 60% equities. The portfolio manager, Penniall & Associates, has a very experienced team of analysts supporting the investment process which actively seeks to outperform the benchmark using the TL Focus methodology.

“Risk comes from not knowing what you are doing.”

Fund Disclosure

The TL Focus Balanced Fund is a Collective Investment Fund (CIF) created by the Hand Composite Employee Benefit Trust, and is administered by Hand Benefits & Trust Company, the trustee. Penniall & Associates, Inc. is the advisor to the fund. The CIF is not a mutual fund. Its shares are not deposits of Hand Benefits & Trust Company or Penniall & Associates, Inc., and are not insured by the Federal Deposit Insurance Corporation or any

other agency. The CIF is a security which has not been registered under the Securities Act of 1933 and is exempt from investment company registration under the Investment Act of 1940.

The TL Focus Balanced Fund is new and does not have actual performance data report. Performance data quoted represents hypothetical past performance of the Penniall Model Portfolio. The performance quoted here does not

guarantee future results. As market conditions fluctuate, the investment return and principal value of any investment will change. Diversification may not protect against market risk. There are risks involved with investing, including possible loss of principal. Before investing in any investment portfolio, the client and the financial professional should carefully consider client investment objectives, time horizon, risk tolerance, and fees.
