

TL Focus Capital Preservation Fund Class R3

Penniall & Associates, Inc.

3rd Quarter 2010

Tri-Level (TL) Focus

Portfolio Level Focus

Three levels of analysis to deliver investment results. TL Focus begins with the economy and markets. Generally, an improving economy provides a positive environment for investing and investors will get paid for taking risk. The opposite would be true when we have a weakening economy. In addition, the portfolio manager will attempt to identify economic "themes" which are trends that are expected to continue and can even be major agents for change. Identifying a theme early can provide the framework for making profitable investment decisions.

Asset Category Level Focus

The next level of analysis consists of determining asset category allocations and assigning a target level of risk (high, medium or low) for each of the 30 categories tracked. We believe academic literature supports the notion that this level of analysis is the most important determinant of investment performance (Brinson, Hood and Beebower 1986).

Individual Investment Level Focus

The fund will target one mutual fund per asset category. This fund will be selected to be consistent with the target risk level described above and will have carefully measured return characteristics. One unique aspect of the investment level analysis is the manager uses "relevant" time periods to measure performance as opposed to the more common calendar-based time periods (1 year, 3 year, 5 year, etc.)

Fund Description

The TL Focus Capital Preservation fund is a "fund-of-funds" and will typically own 30 institutional class mutual funds. The fund's objective is to deliver safety and income by investing heavily in fixed income vehicles. The fund will benchmark performance versus a blend of indexes which are deemed to be representative of the desired risk and reward characteristics of the fund. The blended benchmark is 70% fixed income and 30% equities. The portfolio manager, Penniall & Associates, has a very experienced team of analysts supporting the investment process which actively seeks to outperform the benchmark using the TL Focus methodology.

"Risk comes from not knowing what you are doing."
