Investment Strategy

The Moran Strategic Equity Blend Fund objective is to seek long term growth of capital by combining stocks from three distinct investment disciplines to create a unique portfolio. The managers will select a combination of growth, value and momentum stocks. Holding three styles in one portfolio should help reduce the overall volatility of returns without sacrificing long term objectives. The Fund attempts to exceed the investment performance of the S&P 500 Index.

The S&P 500 Index is a capitalization-weighted index consisting of approximately 500 Large Cap domestic companies. The S&P 500 Index is a blend of both growth and value oriented companies with no particular bias given to either style. Component companies are adjusted for available float and must meet objective criteria for inclusion to the index. Reconstitution for the index is annual.
