Independent Auditor's Report

Board of Directors Hand Composite Employee Benefit Trust Houston, Texas

We have audited the accompanying financial statements of Western Asset Core Plus Bond CIF, included in the Hand Composite Employee Benefit Trust ("Trust" or "Fund"), which comprise the statement of assets and liabilities, including the schedule of investments, as of December 31, 2014, the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

Board of Directors Hand Composite Employee Benefit Trust Page 2

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Western Asset Core Plus Bond CIF, as of December 31, 2014, and the results of its operations and the changes in its net assets for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The schedule of investment purchases and sales listed in the table of contents is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Notes to Financial Statements December 31, 2014

Note 1: Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations

Hand Composite Employee Benefit Trust ("HB&T" or "the Trust") was created in order to provide broad and uniform diversification programs for pension and profit sharing plans which, having complied with the requirements of the Internal Revenue Code (the IRC), are exempt from taxation under the provisions of the IRC. The Trust is comprised of 91 portfolios (the Funds); the financial statements of one of those funds, the Western Asset Core Plus Bond CIF (the Fund), are included in this report.

Each class of the Fund has equal rights as to earnings and assets except that each class bears different distribution, shareholder servicing and transfer agent expenses. Income, expenses (other than expenses attributable to a specific class), and realized and unrealized gains or losses on investments and foreign currency are allocated to each class of units based on its relative net assets.

The Fund's inception date was January 2, 2014.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of investment income and expenses during the reporting period. Actual results could differ from those estimates.

Investment Valuation

All investments in securities are recorded at their estimated fair value. Transfers in and out of Level 1 (quoted market prices), Level 2 (significant other observable inputs) and Level 3 (significant unobservable inputs) are recognized on the period ending date.

Investment Transactions

Investment transactions are accounted for on trade date. Realized gains and losses from investment transactions and unrealized appreciation or depreciation of investments are reported on the identified cost basis.

Foreign Currency

Investment securities and other assets and liabilities denominated in, or expected to settle in, foreign currencies are translated into U.S. dollar amounts at the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts on the respective dates of such transactions.

Notes to Financial Statements December 31, 2014

The Fund isolates that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held.

Reported net realized foreign exchange gains or losses arise from sales of portfolio securities, sales and maturities of short term securities, sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the values of assets and liabilities, including investments in securities at December 31, 2014, resulting from changes in the exchange rates.

Futures Contracts

The Fund uses futures contracts generally to gain exposure to, or hedge against, changes in interest rates or gain exposure to, or hedge against, changes in certain asset classes. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date.

Upon entering into a futures contract, the Fund is required to deposit cash or cash equivalents with a broker in an amount equal to a certain percentage of the contract amount. This is known as the "initial margin" and subsequent payments (variation margin) are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. For certain futures, including foreign denominated futures, variation margin is not settled daily, but is recorded as a net variation margin payable or receivable. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. The daily changes in contract value are recorded as unrealized gains or losses in the statement of operations and the Fund recognizes a realized gain or loss when the contract is closed.

Futures contracts involve, to varying degrees, risk of loss in excess of the amounts reflected in the financial statements. In addition, there is the risk that the Fund may not be able to enter into a closing transaction because of an illiquid secondary market.

Foreign Currency Forward Exchange Contracts

The Fund may enter into foreign currency forward exchange contracts primarily to hedge against foreign currency exchange rate risks on its non-U.S. dollar denominated investment securities. When entering into a forward currency contract, the Fund agrees to receive or deliver a fixed

Notes to Financial Statements December 31, 2014

quantity of foreign currency for an agreed-upon price on an agreed-upon future date. The Fund's net equity therein, representing unrealized gain or loss on the contracts, as measured by the difference between the forward foreign exchange rates at the dates of entry into the contracts and the forward rates at the reporting date, is included in the statement of assets and liabilities. Realized and unrealized gains and losses are included in the statement of operations. These instruments involve market risk, credit risk or both kinds of risks in excess of the amount recognized in the statement of assets and liabilities. Risks arise from the possible inability of counterparties to meet the terms of their contracts and movement in currency and securities values and interest rates.

Written Options

When the Fund writes an option, an amount equal to the premium received by the Fund is recorded as a liability, the value of which is marked-to-market daily to reflect the current market value of the option written. If the option expires, the premium received is recorded as a realized gain. When a written call option is exercised, the difference between the premium received plus the option exercise price and the Fund's basis in the underlying security (in the case of a covered written call option), or the cost to purchase the underlying security (in the case of an uncovered written call option), including brokerage commission, is recognized as a realized gain or loss. When a written put option is exercised, the amount of the premium received is subtracted from the cost of the security purchased by the Fund from the exercise of the written put option to form the Fund's basis in the underlying security purchased. The writer or buyer of an option traded on an exchange can liquidate the position before the exercise of the option by entering into a closing transaction. The cost of a closing transaction is deducted from the original premium received resulting in a realized gain or loss to the Fund.

The risk in writing a covered call option is that the Fund may forego the opportunity of profit if the market price of the underlying security increases and the option is exercised. The risk in writing a put option is that the Fund may incur a loss if the market price of the underlying security decreases and the option is exercised. The risk in writing an uncovered call option is that the Fund is exposed to the risk of loss if the market price of the underlying security increases. In addition, there is the risk that the Fund may not be able to enter into a closing transaction because of an illiquid secondary market.

Purchased Options

When the Fund purchases an option, an amount equal to the premium paid by the Fund is recorded as an investment on the statement of assets and liabilities, the value of which is marked-to-market to reflect the current market value of the option purchased. If the purchased

Notes to Financial Statements December 31, 2014

option expires, the Fund realizes a loss equal to the amount of premium paid. When an instrument is purchased or sold through the exercise of an option, the related premium paid is added to the basis of the instrument acquired or deducted from the proceeds of the instrument sold. The risk associated with purchasing put and call options is limited to the premium paid.

Swap Agreements

The Fund invests in swaps for the purpose of managing its exposure to interest rate, credit or market risk, or for other purposes. The use of swaps involves risks that are different from those associated with other portfolio transactions. Swap agreements are privately negotiated in the over-the-counter market (OTC Swaps) or may be executed on a registered exchange (Centrally Cleared Swaps). Unlike Centrally Cleared Swaps, the Fund has credit exposure to the counterparties of OTC Swaps.

Swap contracts are marked-to-market daily and changes in value are recorded as unrealized appreciation (depreciation). The daily change in valuation of Centrally Cleared Swaps, if any, is recorded as a receivable or payable for variation margin on the statement of assets and liabilities. Gains or losses are realized upon termination of the swap agreement. Collateral, in the form of restricted cash or securities, may be required to be held in segregated accounts with the Fund's custodian in compliance with the terms of the swap contracts. Securities posted as collateral for swap contracts are identified in the schedule of investments and restricted cash, if any, is identified on the statement of assets and liabilities. Risks may exceed amounts recorded in the statement of assets and liabilities. These risks include changes in the returns of the underlying instruments, failure of the counterparties to perform under the contracts' terms, and the possible lack of liquidity with respect to the swap agreements.

OTC swap payments received or made at the beginning of the measurement period are reflected as a premium or deposit, respectively, on the statement of assets and liabilities. These upfront payments are amortized over the life of the swap and are recognized as realized gain or loss in the statement of operations. Net periodic payments received or paid by the Fund are recognized as a realized gain or loss in the statement of operations.

The Fund's maximum exposure in the event of a defined credit event on a credit default swap to sell protection is the notional amount. As of December 31, 2014, the total notional value of all credit default swaps to sell protection is \$7,333,800. This amount would be offset by the value of the swap's reference entity, upfront premiums received on the swap and any amounts received from the settlement of a credit default swap where the Fund bought protection for the same referenced security/entity.

For average notional amounts of swaps held during the period ended December 31, 2014, see Note 4.

Notes to Financial Statements December 31, 2014

Credit Default Swaps

The Fund enters into credit default swap (CDS) contracts for investment purposes, to manage its credit risk or to add leverage. CDS agreements involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default by a third party, typically corporate or sovereign issuers, on a specified obligation, or in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising a credit index. The Fund may use a CDS to provide protection against defaults of the issuers (i.e., to reduce risk where the Fund has exposure to an issuer) or to take an active long or short position with respect to the likelihood of a particular issuer's default. As a seller of protection, the Fund generally receives an upfront payment or a stream of payments throughout the term of the swap provided that there is no credit event. If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the maximum potential amount of future payments (undiscounted) that the Fund could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. These amounts of potential payments will be partially offset by any recovery of values from the respective referenced obligations. As a seller of protection, the Fund effectively adds leverage to its portfolio because, in addition to its total net assets, the Fund is subject to investment exposure on the notional amount of the swap. As a buyer of protection, the Fund generally receives an amount up to the notional value of the swap if a credit event occurs.

Implied spreads are the theoretical prices a lender receives for credit default protection. When spreads rise, market perceived credit risk rises and when spreads fall, market perceived credit risk falls. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to enter into the agreement. Wider credit spreads and decreasing market values, when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. Credit spreads utilized in determining the period end market value of credit default swap agreements on corporate or sovereign issues are disclosed in the notes to financial statements and serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for credit derivatives. For credit default swap agreements on asset-backed securities and credit indices, the quoted market prices and resulting values, particularly in relation to the notional amount of the contract as well as the annual payment rate, serve as an indication of the current status of the payment/performance risk.

The Fund's maximum risk of loss from counterparty risk, as the protection buyer, is the fair value of the contract (this risk is mitigated by the posting of collateral by the counterparty to the Fund to cover the Fund's exposure to the counterparty). As the protection seller, the Fund's maximum risk is the notional amount of the contract. Credit default swaps are considered to have credit risk-related contingent features since they require payment by the protection seller to the protection buyer upon the occurrence of a defined credit event.

Notes to Financial Statements December 31, 2014

Entering into a CDS agreement involves, to varying degrees, elements of credit, market and documentation risk in excess of the related amounts recognized on the statement of assets and liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreement may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreement, and that there will be unfavorable changes in net interest rates.

Interest Rate Swaps

The Fund enters into interest rate swap contracts to manage its exposure to interest rate risk. Interest rate swaps are agreements between two parties to exchange cash flows based on a notional principal amount. The Fund may elect to pay a fixed rate and receive a floating rate, or receive a fixed rate and pay a floating rate, on a notional principal amount. Interest rate swaps are marked-to-market daily based upon quotations from market makers and the change, if any, is recorded as an unrealized gain or loss in the statement of operations. When a swap contract is terminated early, the Fund records a realized gain or loss equal to the difference between the original cost and the settlement amount of the closing transaction.

The risks of interest rate swaps include changes in market conditions that will affect the value of the contract or changes in the present value of the future cash flow streams and the possible inability of the counterparty to fulfill its obligations under the agreement. The Fund's maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from the counterparty over the contract's remaining life, to the extent that that amount is positive. This risk is mitigated by the posting of collateral by the counterparty to the Fund to cover the Fund's exposure to the counterparty.

Swaptions

The Fund purchases and writes swaption contracts to manage exposure to an underlying instrument. The Fund may also purchase or write swaptions to manage exposure to fluctuations in interest rates or to enhance yield. Swaption contracts written by the Fund represent an option that gives the purchaser the right, but not the obligation, to enter into a previously agreed upon swap contract at a future date. Swaption contracts purchased by the Fund represent an option that gives the Fund the right, but not the obligation, to enter into a previously agreed upon swap contract at a future date.

When the Fund writes a swaption, an amount equal to the premium received by the Fund is recorded as a liability, the value of which is marked-to-market daily to reflect the current market value of the swaption written. If the swaption expires, the Fund realizes a gain equal to the amount of the premium received.

Notes to Financial Statements December 31, 2014

When the Fund purchases a swaption, an amount equal to the premium paid by the Fund is recorded as an investment on the statement of assets and liabilities, the value of which is marked-to-market daily to reflect the current market value of the swaption purchased. If the swaption expires, the Fund realizes a loss equal to the amount of the premium paid.

Swaptions are marked-to-market daily based upon quotations from market makers. Changes in the value of the swaption are reported as unrealized gains or losses in the statement of operations.

Investment Income and Distribution of Income

Dividend income less foreign taxes withheld, if any, is recorded on the ex-dividend date and interest income is recorded on the accrual basis. Investment income is allocated ratably on the valuation dates among all participants. No distributions are made to participants in the Fund until units owned are redeemed, at which time the market value of redeemed units is distributed. Investment income and realized gains (if any) earned by the Fund are reinvested, thereby increasing the respective unit values.

Valuation of Participants' Interest

Units of participation may be purchased or redeemed on the valuation dates at the fair value per unit on such valuation dates. The Fund is valued daily.

Federal Income Taxes

The Funds comply with the requirements under Section 501(a) of the IRC and apportion all of their taxable income to their participants. Therefore, no federal income tax provision is required.

Subsequent Events

Subsequent events have been evaluated through the date of the Independent Auditor's Report, which is the date the financial statements were available to be issued.

Investment Management Advisors

The investment management advisor for the Fund is Western Asset Management Company.

Notes to Financial Statements December 31, 2014

Note 2: Futures Contracts

At December 31, 2014, the Fund held the following open futures contracts:

	Number of Contracts	Expiration Date		Basis Value	Fair Value	Unrealized Appreciation (Depreciation)
Contracts to Buy:						
90-Day Eurodollar	11,500,000	12/15	\$	11,422,237	\$ 11,394,775	\$ (27,462)
90-Day Eurodollar	34,000,000	06/16		33,456,017	33,513,800	57,783

Note 5: Written Options Rollforward

During the year ended December 31, 2014, written option transactions for the Fund were as follows:

	Number of Contracts/ Notional Amount	Pı	remiums
Written options, outstanding as of December 31, 2013	-		-
Options written	2,403,660	\$	1,662,641
Options closed	(525)		(258,629)
Options exercised	(2,400,854)		(393,126)
Options expired	(1,868)		(768,199)
Written options, outstanding as of December 31, 2014	413	\$	242,687

Note 6: Investment Advisory Fees and Other Transactions With Affiliates

The Fund is charged an administrative fee by HB&T for trustee/administrative services (fund accounting services, transfer agency services, trustee services, etc.). The Fund has also entered into investment advisory and service agreements with a third party advisor. These fees compensate the advisor for the services it provides and for expenses borne by the advisor under the agreement.

Notes to Financial Statements December 31, 2014

During the year ended December 31, 2014, the investment advisor voluntarily reimbursed the Fund for a portion of its expenses.

The following table indicates the fees charged to the Fund and the various classes of units within the Fund (as a percentage of net assets). These charges are calculated using the Fund's prior day's total net assets.

Fund	Trustee/ Administrative Fees	Investment Management Fees	Total Fees
Western Asset Core Plus Bond CIF:			
Class R1	0.04%	0.30%	0.34%
Class R-INT	0.04%	0.00%	0.04%

Note 9: Disclosures About Fair Value of Financial Instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements must maximize the use of observable inputs and minimize the use of unobservable inputs. There is a hierarchy of three levels of inputs that may be used to measure fair value.

- **Level 1:** Quoted prices in active markets for identical assets or liabilities.
- **Level 2:** Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- **Level 3:** Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

On the following page is a description of the valuation methodologies and inputs used for assets and liabilities measured at fair value on a recurring basis and recognized in the accompanying statement of assets and liabilities, as well as the general classification of such assets and liabilities pursuant to the valuation hierarchy. There have been no significant changes in the valuation techniques during the year ended December 31, 2014.

Notes to Financial Statements December 31, 2014

Preferred Stock. Securities traded on a national securities exchange (or reported on the NASDAQ national market) are valued at the last reported sales price or official closing price as reported by an independent pricing service on the primary market or exchange on which they are traded and are categorized as Level 1 in the hierarchy.

Corporate and Municipal Bonds. The fair value of corporate and municipal bonds is estimated using various techniques, which may consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. These securities are categorized as Level 2 in the hierarchy.

Floating Rate Loans. The fair value of floating rate loans is generally valued using recently executed transactions, market price quotations (where observable), bid/ask quotes received by brokers specializing in floating rate loans and market observable credit default swap levels. Floating rate loans are categorized as Level 2 in the hierarchy.

Foreign Government Obligations. Foreign government obligations are valued using models that incorporate foreign market observable data, such as reported sales of similar securities, broker quotes, yields, bids, offers and reference data. Certain securities are valued principally using dealer quotations. These securities are categorized as Level 2 in the hierarchy.

Asset-Backed and Mortgage-Backed Securities and Collateralized Mortgage Obligations. These securities are valued using models that incorporate observable data, such as prepayments, delinquencies, yields, bids, offers, collateral seasoning and other factors. Deal specific scenarios are derived from historical performance information and loan level details. These securities are categorized as Level 2 in the hierarchy.

U.S. Government Agencies and Obligations. U.S. Government agencies and obligations are valued using a model that incorporates market observable data, such as reported sales of similar securities, broker quotes, yields, bids, offers and reference data. Certain securities are valued principally using dealer quotations. U.S. Government obligations are categorized as Level 2 in the hierarchy.

Call and Put Options. Options are marked-to-market based on quoted market prices in active markets. If recent market transactions are not available, observable market quotations are obtained from brokers specializing in options. Options are generally categorized as Level 2 in the hierarchy.

Future Contracts. Futures contracts are marked-to-market on the daily fluctuations between the contract price and the market value of the underlying, as reported on a recognized exchange. Futures contracts are categorized as Level 1 in the hierarchy.

Foreign Currency Contracts. These contracts are valued at the prevailing forward exchange rate of the underlying currencies on the reporting date and unrealized gains or losses recorded daily. Foreign currency contracts are generally categorized as Level 2 in the hierarchy.

Notes to Financial Statements December 31, 2014

Credit Default Swaps. Credit default swaps are traded on the over-the-counter (OTC) market. Fair value for credit default swaps is based on models which take into account multiple inputs including specific contract terms, interest rate yield curves, interest rates, credit curves, recovery rates and current credit spreads obtained from swap counterparties and other market participants. Many inputs into the model do not require material subjectivity as they are observable in the marketplace or set per the contract. Other than the contract terms, valuation is heavily determined by the difference between the contract spread and the current market spread. The contract spread (or rate) is generally fixed and the market spread is determined by the credit risk of the underlying debt or reference entity. As the underlying debt on credit default swaps held by the Fund are liquid and the OTC market for the current spread is active, credit default swaps are categorized as Level 2 in the hierarchy.

The following table presents the fair value measurements of assets and liabilities recognized in the accompanying statement of assets and liabilities measured at fair value on a recurring basis and the level within the fair value hierarchy in which the fair value measurements fall at December 31, 2014.

Note 10: Risk Factors

Investment Securities Risk

The Fund invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such change could materially affect the amounts reported in the accompanying statement of assets and liabilities.

Foreign Securities Risk

Securities traded in foreign markets have often (though not always) performed differently from securities traded in the United States. However, such investments often involve special risks not present in U.S. investments that can increase the chances that the Fund will lose money. In particular, the Fund is subject to the risk that because there may be fewer investors on foreign exchanges and a smaller number of securities traded each day, it may be more difficult for the Fund to buy and sell securities on those exchanges. In addition, prices of foreign securities may go up and down more than prices of securities traded in the United States.

Notes to Financial Statements December 31, 2014

Currency Risk

Securities and other instruments in which the Fund invests may be denominated or quoted in currencies other than the U.S. dollar. Changes in foreign currency exchange rates may affect the value of the Fund's portfolio. Because the Fund's assets are primarily invested in securities of foreign countries, the U.S. dollar equivalent of the Fund's net assets would be adversely affected by reductions in the value of the foreign currencies relative to the U.S. dollar. For this reason, changes in foreign currency exchange rates can affect the value of the Fund's portfolio. Generally, when the U.S. dollar rises in value against a foreign currency, a security denominated in that currency loses value because the currency is worth fewer U.S. dollars. Conversely, when the U.S. dollar decreases in value against a foreign currency, a security denominated in that currency gains value because the currency is worth more U.S. dollars. This risk, generally known as "currency risk," means that a strong U.S. dollar may reduce returns for U.S. investors in foreign stocks while a weak U.S. dollar may increase those returns.

Note 11: Derivative instruments and hedging activities

The following is a table, grouped by derivative type, provides information about the fair value and the location of derivatives within the statement of assets and liabilities at December 31, 2014.

	Derivatives	(1)
Asset	Derivatives	

	Inte	erest Rate Risk		Foreign xchange Risk	Cre	dit Risk		Total

Notes to Financial Statements December 31, 2014

- (1) Generally, the balance sheet location for asset derivatives is receivables/net unrealized appreciation (depreciation) and for liability derivatives is payables/net unrealized appreciation (depreciation).
- ²⁾ Market value of purchased options is reported in Investments at value in the statement of assets and liabilities.
- (3) Includes cumulative appreciation (depreciation) of futures contracts as reported in the footnotes. Only variation margin is reported within the receivables and/or payables on the statement of assets and liabilities.
- (4) Includes cumulative appreciation (depreciation) of centrally cleared swap contracts as reported in the footnotes. Only variation margin is reported within the receivables and/or payables on the statement of assets and liabilities.

The tables shown below provide information about the effect of derivatives and hedging activities on the Fund's statement of operations for the year ended December 31, 2014. The first table provides additional detail about the amounts and sources of gains (losses) realized on derivatives during the period. The second table provides additional information about the change in unrealized appreciation (depreciation) resulting from the Fund's derivatives and hedging activities during the period.

Amount of Realized Gain (Loss) on Derivatives Recognized

	Int	Interest Rate Foreign Risk Exchange Risk Credit Risk				Total		
Purchased options (1)	\$	(195,229)	\$	(36,622)	\$	_	\$	(231,851)

⁽¹⁾ The change in unrealized appreciation (depreciation) from purchased options is reported in the change in net unrealized appreciation (depreciation) from investments in the statement of operations

Notes to Financial Statements December 31, 2014

During the year ended December 31, 2014, the volume of derivative activity for the Fund was as follows:

<u>-</u>	Average Market Value			
Purchased options Written options	\$	15,382 103,275		
Futures contracts (to buy)		63,341,245		
Futures contracts (to sell)		64,531,196		
Forward foreign currency contracts (to buy)		1,591,604		
Forward foreign currency contracts (to sell)		10,144,389		
	Average Notional Balance			
Interest rate swap contracts† Credit default swap contracts (to sell protection)	\$	7,164,615 1,852,362		
†At December 31, 2014, there were no open positions held in this derivative	÷.			

The following table presents, by financial instrument, the Fund's derivative assets net of the related collateral received by the Fund at December 31, 2014:

	Deriva in the of A	Amount of tive Assets Statement ssets and bilities ⁽¹⁾	Collateral Received		Net Amount	
Purchased options ⁽²⁾ Centrally cleared swap contracts ⁽³⁾ Forward foreign currency contracts	\$	80,792 3,688 189,625	\$	- - -	\$	80,792 3,688 189,625
Total	<u>\$</u>	274,105	\$	0	\$	274,105

The following table presents, by financial instrument, the Fund's derivative liabilities net of the related collateral pledged by the Fund at December 31, 2014:

	of D Lia the S of A	ss Amount Derivative bilities in Statement ssets and bilities ⁽¹⁾	Collateral Pledged ⁽⁴⁾⁽⁵⁾		Net Amount	
Written options Futures contracts ⁽³⁾ Forward foreign currency contracts	\$	207,786 52,590 73,482	\$	(52,590)	\$	207,786 - 73,482
Total	\$	333,858	\$	(52,590)	\$	281,268

Notes to Financial Statements December 31, 2014

- (1) Absent an event of default or early termination, derivative assets and liabilities are presented gross and not offset in the statement of assets and liabilities.
- (2) Market value of purchased options is shown in Investments at value in the statement of assets and liabilities.
- (3) Amount represents the current day's variation margin as reported in the statement of assets and liabilities. It differs from the cumulative appreciation (depreciation) presented in the previous table.
- Gross amounts are not offset in the statement of assets and liabilities.
- (5) In some instances, the actual collateral received and/or pledged may be more than the amount shown here due to overcollateralization.
